

**DIRECTIONS:**

The optimal temperature range for effectiveness is from 54 - 113 degrees F.

**Drains, Grease Traps, Lift Stations:** Apply 3-8 oz of **Super Zyme** per day. Try to do so at the time of least activity. This will give the bacteria more time to begin activity. Do not run dishwashers shortly after use and do not use drain openers, disinfectants or any other chemical in the drains shortly after using **Super Zyme**.

# SUPER ZYME

## Bacterial Drain Line Treatment

CAUTION

KEEP OUT OF REACH OF CHILDREN  
Net Contents: 1 gal (3.79 L)

**Super Zyme** is a blend of bacterial cultures that are non-toxic and non-pathogenic. These enzymes will multiply when exposed to wastes and excrete enzymes which reduce the content of fat, starch and protein in wastes. **Super Zyme** contains 500 million CFU/mL of bacteria.

1692-001

**CAUTION**  
Dispose of contents/container in accordance with federal, state and local regulations.

INGREDIENTS (CAS#): Water (7732-18-5),  
Bacterial Cultures.
