

20/20

Glass and Mirror Cleaner

Non-Streaking

Phosphate Free

Non-Ammoniated

Fast-Drying

20/20 is a powerful cleaning compound combining emulsifiers, surfactants and solvents to provide rapid cleaning action without streaking on glass, mirrors, chrome, countertops, porcelain, tile, vinyl, acrylics, plastics and stainless steel.

20/20 will remove grease, oil, dirt and is harmless to paint, enamel or lacquer when used as directed. It is especially effective on auto windshields and mirrors. Because it contains no ammonia, **20/20** is safe to use on plastics and doesn't have the unpleasant odor that most glass and mirror cleaners have.

20/20 is available in liquid or aerosol.
