

FLOOR CARE

Dissolve

Dissolves Urine Salts

Highly Concentrated - Economical

Professional Strength Formulation

Contains a Corrosive Inhibitor

Dissolve is a concentrated blend of cleaning agents formulated to professionally clean carpet. It dissolves and neutralizes urine salts so that they can be removed easily.

Dissolve is a mild acid that can be applied as a pretreatment to areas that have been soiled by urine. It should be followed with normal extraction cleaning with a detergent like Detco's **Down Under**.

Dissolve contains a corrosion inhibitor for added protection of the equipment and surfaces.

Dissolve can also be used in other cleaning applications where urine salts need to be dissolved such as in bathrooms.
