

Undercoat

Water-Based Floor Sealer

Fast Drying

Self-Leveling

Long Wearing

Non-Yellowing

Undercoat reduces floor maintenance costs by sealing floors with a tough, acrylic layer that eliminates porous floor absorption of wax or finish.

Undercoat improves the bonding of **Magna Gloss 25** that is to be applied to the floor surface. This sealing operation will enhance the luster, prolong wear and increase durability of the finished surface.

Undercoat is the base for **Magna Gloss 25** to provide the "Wet Look" that is desired.
