

Anti-Lock

Extreme Temperature & Pressure Lubricant

Acts as a Sealant

Reduces Seizure, Corrosion, Rusting & Galling

Does Not Evaporate or Harden

Excellent Coverage

Anti-Lock is a non-corrosive, anti-seize compound which permits easier removal of threaded parts. It reduces thread distortion, prevents “frozen parts” and withstands temperature extremes up to 2,100° F.

Anti-Lock provides excellent lubrication under extreme pressure with both high and low temperature conditions. It is recommended for both indoor and outdoor use to protect metal parts and gaskets for machinery, vehicles and equipment against seizure and wear.
