

SOIL CARE

# Wet Water

## Low Foam Wetting Agent & Penetrant

**Biodegradable**

**Non-Flammable**

**Makes Water “Wetter”**

**Highly Concentrated**

**Wet Water** is a blend of non-ionic wetting agents formulated to assist lawn and turf caretakers with watering and maintenance problems.

**Wet Water** lowers the surface tension of water, thereby allowing deeper penetration of the ground, while providing faster drying time on the surface. It greatly improves spreading and quick wetting of fungicides, herbicides and insecticides.

**Wet Water** inhibits dew formation on golf greens. It is also used to control dusty roads, fields, coal mines, etc., and can be used as an aid when compacting soils for highways, fills, airport runways and trenches.
