

DIRECTIONS:

SHAKE WELL BEFORE USING

The vehicle should be cleaned with an appropriate detergent, rinsed and allowed to dry prior to application.

Spray a thin coat onto the pre-cleaned surface, then spread evenly with a cloth. Rub gently with a soft, dry cloth to bring out the shine. Multiple coats may be used if a deeper shine is desired of for a first-time application.

Spray-N-Shine can be diluted 1 part product to 2 parts water to thin out the product if desired.

For light coats, **Spray-N-Shine** can be diluted 1 part product to 16 parts water.

Spray -N- Shine

Liquid Carnauba Wax for Vehicles

CAUTION

KEEP OUT OF REACH OF CHILDREN
Net Contents: 1 quart (0.95 L)

Spray-N-Shine is a water-based, liquid vehicle polish that removes light oxidation and leaves a strong protective coating containing carnauba wax. It is extremely high gloss, has excellent water resistance and helps protect the clear coat finish from stains, sunlight and corrosion.

Spray-N-Shine can be used on any metal or plastic surface to produce a brilliant shine, repel water and provide protection.

1624-Q12
