

DIRECTIONS:

NOTE: This product may be harmful to some types of plastic. Always test in a small inconspicuous area first.

Grease Traps: Use a sufficient amount to provide a 1 to 3 inch layer on the surface of the grease trap. To calculate this, multiply the length x width x desired depth in inches, then divide that number by 231. This will provide you with the gallons required. Add additional product to the grease trap as needed.

CITRI-FLOAT

Grease Trap & Lift Station Degreaser

DANGER

KEEP OUT OF REACH OF CHILDREN
Net Contents: 1 quart (0.95 L)

Citri-Float is a powerful degreaser created from natural orange peel extracts that is not water emulsifiable.

0245-SAMQ
