

# Pan-Gels

## A/C Drain Pan Tablets

**Non-Corrosive**

**Timed Release**

**Lasts Up to 6 Months**

**Locks Into Place**

**Pan-Gels** are a unique approach to A/C drain pan treatment. As moisture contacts the geltab, it forms a gel, locking the geltab into place. This locking action never allows the geltab to move or block the drain line.

**Pan-Gels** are non-corrosive and do not contain the harsh chemicals that some drain pan treatments have that can damage the pan.

**Pan-Gels** will protect for up to 6 months, and because they are activated by moisture, their shelf life is much longer than conventional treatments.

**Pan-Gels** are available in two sizes. The UT-3 can be used for units up to 5 tons and the UT-15 are used for units up to 15 tons.
