

Brite

Dish Washing Detergent

Highly Concentrated

Biodegradable

Reduces Spotting

Brite is a highly concentrated dishwashing detergent used to clean dishes, pots, pans, cooking utensils and glassware. It quickly lifts off dirt, grease, grime, oily residue, food and food stains. Also can be used for countertops, stovetops and other kitchen surfaces.

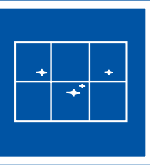

Brite reduces spotting and streaking by keeping calcium and magnesium in suspension, thereby not allowing deposits to form on the dishes.
