

CONCRETE

Crete Away

Non-Hazardous Concrete Remover

Safe on Paint

Biodegradable

Non-Corrosive

Safe to Use

Non-Flammable

Non-Fuming

Crete Away is the answer to faster, safer removal of hardened or cured concrete residues, mortar, cement based stucco and grout off virtually any surface.

Crete Away is an acid alternative with no fumes. It does not contain muriatic, hydrochloric, hydrofluoric, sulfuric or phosphoric acids. It attacks the portland in cement, completely dissolving the hardened molecular structure back into rinsable mud.

Crete Away is safe for use on painted surfaces, plastic, aluminum, glass, rubber and more. Use **Crete Away** on mixers, forms, pumps, screeds, vibrators, augers, concrete saws, etc.
