

Brake Wash

**Fast Drying
Non-Chlorinated Formula**

Fast Drying

Flushes Away Dirt & Grime

Stops Disc Brake Squeal

Brake Wash is a fast drying, non-chlorinated solvent for cleaning brake parts. It removes contaminants from brake linings, discs and caliper assemblies, wheel cylinders, drums and bearings.

Brake Wash leaves no residue to cause squeaking or uneven brake wear.

Brake Wash thoroughly wets and washes away brake dust, road deposits and other buildup. Recommended for inspection cleaning since the spray will reach between and around brake components left in position.

Brake Wash is extremely flammable and caution should be exercised when using this product.
