

Dazzle

Concentrated Aluminum Brightener

Concentrated

Non-Fuming

Brightens Aluminum

Dazzle is an aluminum brightener and truck wash that does not contain hydrochloric or hydrofluoric acid. It does not have the harsh fumes that other aluminum brighteners do. It will not harm the surface when used according to directions.

Dazzle can be used as the first step in a two-step washing system or used as a stand alone product.

Dazzle can be applied from 15 parts water to 1 part chemical to provide excellent cleaning and brightening. It can be diluted up to 25 parts water with 1 part chemical for light applications.
